

Geologist

The ideal candidate must have previous experience working on geological and/or geotechnical engineering projects. However, we are open to provide training for the right candidate with 3 to 5 years of experience related to site geological mapping, geotechnical investigation, and technical report preparation. Based in our Redding (California) office. This position will be a mix of office and field work.

Duties:

- Preparation of work plans and permits for encroachment and borings/wells
- Geotechnical investigation (drilling, test pits, compaction testing...)
- Preparation of site maps, cross sections, drill/test pit logs
- Assistance with preparation of geotechnical reports; and observations during project construction (keyway review, fill placement observation, compaction, foundation excavation...)

Knowledge of Microsoft Office is required and experience with geo-engineering software (log plot, drafting/illustration software, rock mechanics).

We are seeking a self-starter with a strong desire to learn and be a part of a team. Must be willing to travel within the northern California region.

PG license preferred.
